# Mines and Prospects--Furnaces and Mills

### CAPT. DE LA MAR A BIRD OF PASSAGE

Goes Through the State After Acquiring Nevada Gold Mines-Return of P. J. Donahue.

His examination of mines in Callfornia and Nevada for Eastern and Utah clients concluded P. J. Donohue, the expert mining man, came in from the West Thursday night to await returns from his samples. On his ride from the diggings to Ogden Mr. Donohue had as a most agreeable companion none other than Capt. J. R. De La Mar, whose ticket was taking him to New York city. With M. E. Heller, One of his field representatives, the dis-thinguished miner who has added a bon-anna to every State in which he has ever operated, had been to the Funeral range, where he has, through Tartwig A. Cohen acquired a bond on another the scale hearing rooms and on which ble gold-hearing group, and on which he has made initial payment. Work there will be prosecuted in a manuer

there will be prosecuted in a manue that has always characterized the Cap

that has always characterized the Cap-tain's undertakings.

At Fish lake on the line between Ne-vada and California Mr. Donohue con-ducted an examination of the Tonopah-Utah company's properties that prom-lse, said he, to develop into a mine of considerable prominence. The ore was discovered at the creat of a blow-out 25 feet in width, and already there is ready for market, three carloads that the management believes will show as much as 200 ounces silver with from 10 to 20 per cent lead. In the same local-by E. W. Clarke, the manager of Sendeveloping a group with good results, while a large number of prospectors from Tonopah are invading the region. from fomegan are invading the region. At McAfee, on the southern margine of Fish lake, a big gold find is reported with 200 tons of ore now on the dump. Among others whom Mr. Donohue met going into the region out of Sodaville was George Kislingbury, a former superintendent of the Golden Gate mines of March 1987. at Mercur. The gentleman is now rep-tesenting a California syndicate. Mr. Donohue would not discuss the proper-ties sampled by him in California, but his report has been forwarded East and fate of the deal will have soon been

#### DON PEDRO IS SOLD.

#### Wealthy Crowd Captures Another Likely Property at Old Stockton.

The Don Pedro mine at Stockton. over the acquisition of which there has been not a little rivalry since the restoration of that camp was assured, has passed into the hands of W. C. Alexander, Joseph Dederichs, and others prominently identified with the ex-ploitation of the Black Diamond Mining company, the vendor, Charles Den-ton, of that camp and at present among the forces on the Honerine. While the Don Pedro has never been systematically explored it presents conditions identical with those that characterize the neighboring producers and the purchasers are quite confident that it will be made to respond as freely with development. Their inten-tion is to sink upon it and to proceed at once on an application for patent. To what level the purchasers were required to go into their pockets in landing the bargain they were not ready to close at the hour of going to press.

#### CHECKED OUT DIVIDEND.

#### A Happy Day for Local Shareholders in the U.S. Company.

Checks, in payment of the United States company's initial distribution of fifty cents a share, or \$20,000, made their appearance among local shareholders yesterday morning, and before night there had been added to local cash reserves approximately \$15,000, with the assurance of those in posses-sion of the larger blocks that the pleasant performance shall be repeated at a later period the present year. The a jater period the present year. The cheerful remittances which bore the signature of F W. Batchelder, are made payable through the First National Bank of Boston, which fortunate city draws down the lion's share of the dividend. It is said in the East that the next distribution will be in ample time for a proper observance of the holidays, Meanwhile the mines are smelter are responding most liberally and the surplus is hourly increasing

### THE PORTLAND CONTEST.

#### Denver and Salt Lake to Measur Swords Over Permanent Home.

In an edition prepared especially for the gress at Portland, Or., the Mining Recor has filled its pages with much that wi has filled its pages with much that will instruct and in its discussion of the context for the permanent home of the congress deals with the various applicants quite impartially. Sait Lake Clly and benver have entered the race for the honor," says the Record, "and the indications are that there will be some lively skirmishing between the delegates of the two sections at the Portland gathering. No other city appears to be asking the congress to choose it for the location of the permanent headquarters, although El Pano, Tex., is making preparations to capture the next convention. Some of the delegates have expressed the opinion that the next gathering will go to the city which secures the permanent headquarters, but El Pano does not think so. The plan is for the congress to erect a building and to appeal to the citizens of the city so favored for contributions. "The building committee consists of Col. Thomas Ewing of Los Angeles, chairman, David H. Moffat, Denver, and J. R. Leonard of Pittsburg.

"The Commercial city of Sait Lake City will send a big delegation to Portland and hold out inducements to the congress to select that city while the Chamber of Commerce of Denver has decided to send its president, James F. Callbreath, to represent benver in the context. Judge O. W. Powers of Salt Lake City, will seeak in benulf of that place. Both cities will present strong claims, and either should make a good choice."

New Sun Typewriter, \$40. Carbons, ribbons for all machines, Pembroke sells them.

#### THE DAY ON 'CHANGE.

#### Columbus of Alta Sets the Pace for the Various Sprinters.

For \$1119.45, with which the buyer on

ored the pit yesterday he was permitted to depart with 20,700 chargs of stock, nor to depart with 20,790 theres at stock, nor were the shops depleted at the close. Columbus Con was the feature of day's trading, the market for its wares advancing randing to \$1.0, although it received around the close to \$1.0, while the Judge was marked down to \$1.50 and Paly to \$2.50, although a nickel better was promised for the same shares sixty days later. Daily West was massed without a transfer as was Grand Central, for which latter \$1.10 was bid, while for, Mercur crops out to 22 cents, with Para, on whose dividend the transfer books close next week, flattening out to \$2 cents and Uncle Sam to 21. Virkee Con, was traded in quity notively around \$5 cents and Shar Con, at 13%, while New York, with another lots of ore on its way to market, was traded in around \$2, the day closing on the following market.

### COLUMBUS MILL'S SEPTEMBER START

Director McCornick Visits the Plant and Properties at Alta and Returns Much Elated.

The new mill with which the recondclass ores of the Columbus Con. of Alta are to be converted into first-clare concentrates containing silver and lead, copper and gold, is now under cover, copper and gold, is now under cover, and, unless prevented by delays unformen, will, said Clurence K. McCornick upon his return from camp yesterday, go into commission not later than September 15 next. To this end the various machines and fittings are now being rapidly knitted into their spending very satisfactorily, said Mr. Dickes and with the will be operation. niches, and with the mill in operation he has no doubt of most lucrative results. With the volume of ore awalting it indeed, these results cannot get away. With the condition underground, Director McCornick was equally well pleased. The new ore body in the winze below the main tunnel level has opened pleased. The new ore body in the winze below the main tunnel level has opened up into thirteen feet between walls, will not a small percentage of it of shipping quality, and white some have complained that the output of this complained that the output of this class has not been more energetic, to begin extraction before the milt is ready for the second-class would be unminer-like and necessitate the handling of the mill oren a second time at corresponding expense. To Mr. McCornick, who had not been to the mine since his departure for France, whither he was summoned to attend the Gold Road company's annual, several new sources of wealth were revealed, and he comes back more than ever assured of the ultimate carnings of the Colum-

In the camp generally there is much activity, and with the old Emma and Flagstaff in operation again it will have been restored to the animation of former days.

#### RICH GOLD ROCK.

#### Another Yellow Streak in the Jefferson Company's Properties.

From a ten-inch streak in the propcity of the Jefferson Mining company, between Little and Big Cottonwood canyons and along the bench overlookeighteen inches. The management has some of this ore now at the surface, and expects to make a shipment in a short time. Meanwhile the volume of milling ore is steadily increasing, and that a plant for its reduction shall be pro-

vided next season is most likely Mr. Schule left for St. Louis last night to participate in the Turn Verein contests that are to enliven the pro-gramme at the big show next week. As a member of that organization in Milwaukee he carries one of the championships of America, and that he will succeed in defending it his splendid physical condition at this time admits of no doubt. The contest over and the victory properly celebrated, he will re-turn to hie camp in the diggings hoping to be able to present the company with a fortune before the close of

#### FROM QUINCY GROUP.

#### Salt Lake Engineer Tells of Rich Ore and Utah Crowd's Luck.

E. P. Jennings, the expert mining ongineer and field representative of a syndicate headed by Rob Walker of this city has returned from Nevada bringing with him options on a number of likely propositions to which his attention was recently invited, the fate of them to be decided in the next few days. At Crow Springs, Nye county, Mr. Jennings has, in behalf of his syndicate, inaugurated work on the Quincy group in which some very high-grade argentiferous lead one is exposed and from which a shipment was recently made to the smelters of this valley. Some of the ore affords as much as 800 ounces of silver and 52 per cent lead per ton. with the average a strong one, the ores occurring in fissures in the porphyry and quartitle. The fissures are numer-ous and their contents rich. He left the group and a haif dozen miners in charge of J. B. Gladden. At Goldfield Mr. Jennings found the

At Goldfield Mr. Jennings found the camp a most interesting one, with everything, from prospect to producer, held in an esteem so high that it is difficult to reach it. From the four mines producing at this time he saw some of the ores that are booming the camp. They are of excellent quality and in big body and would no doubt astonish the world. The ground is staked out in every direction and in camp at this time are about 2000 persons many this time are about 2000 persons, many of whom appear to be prospering. Mr. Jennings will leave for the diggings again in a short time to renew his earch for something commensurate with the size of his syndicate, which

Lulu Mining Company Incorporates. A copy of the articles of incorporation of the Lulu Mining company, organized at Cheyenne, Wyo, was filed in the office of the County Clerk yesterday. The capital stock of the corporation is \$300.00 divided into shares of the par value of \$1 each. Patrick Ryan, the president of the company, is named as the local agent in Salt Lake county. Edward McGurrin, also of this city, is secretary of the company.

### RICH LEAD ORES OF OLD PIOCHE

Sample From a New Discovery That Reproduces the Sensational Story of Former Days.

A slab of almost pure lead, running well up in silver, with fractional values in gold, which was yesterday morning brought in by Oscar Olsen and Henry Lee from the Florence mine out of Pioche, affords a story of another rich trike in a region from which a former generation derived so much of its ealth. The sample was broken from ledge thirty inches in width which assays from 57 to 86 per cent lead and from 30 to 54 ounces silver, the rock making tomage about as rapidly as any of which the earth is capable. The ledge, which is eleven miles west of Pinche, has been followed down to a nepth of 65 feet and that shipments will begin to arrive from it in short time is well assured.

At the properties of the Pioche Ne-vada Con in the same locality Mr. Olsen reports 12 feet of ore exposed in the crosscut with 4 feet running very high in lead, while at the properties being developed by Charles C. Garri-

sponding very satisfactority, said Mr, Lee, who is the recorder of Lincoln county, Nev. and that the syndicate county, Nev. and that the syndicate headed by Hon. C. O. Whittemore of this city will exercise its option on the Chief group appears quite positive. The reports from it, he added, are all most favorable and the owners, per-

#### "UP AGAINST IT."

#### Ohio Company Presents Its Neighbor With Fine Channel of Copper.

To the Ohlo Copper company, neighboring bonanza on the same great copper, gold and silver-bearing zone at Bingham, is the management of the Utah Copper company indebted for one of the most important disclosures in the domains of the latter, and while it has not been exploited, it is neverthefere included among its most promising less included among its most promising assets. The disclosure occurs in the All's Well ledge, opened up in the Ohio and followed by it to the line at which its neighbor's rights begin. Along this stretch the ledge was productive of some of the best ore ever dug from the camp of copper, said Manager Catrow yesterday, and while lamenting, of course, his inability to proceed further, he is rejoicing that it is to enrich a most agreeable neighbor. At no station on the ledge was the condition more gratifying, said Mr Catrow, than was it canyons and along the bench overlooking the valley, the management is at present digging ore which shows a valuation of \$62 gold, with 25 per cent copper, said F. W. Schule, the assayer at camp, yesterday. Nor is it the best of which the mine has shown itself capable, previous assays revealing as much as \$160 in the yellow metal, with very high percentages in copper. The channel in which this rock occurs has been followed down for not a little depth below the tunnel level, the rich streak at intervals showing a width of eighteen inches. The management has gratifying, said Mr. Catrow, than was it when the hour came for him to per cent copper, his productive of a concentrate equal to any ever dispatched out of the camp. To this source of wealth the Utah Copper company is moving, but moving deliberatey, as the supply from other chan-nels is keeping its concentrator busy. However, connection with it will have been made the present season, and to its high-grade concentrates from an

condition in indeed, a cheerful one.

General Manager Jackling of the Utah Copper company, who came in from camp during the day, says the main level advancing south from his company's quinn tunnel, will ultimately the AMS Well country. tap the All's Well country. To reach it, however, it will have to be extended about 3000 feet from the tun-nel station, and with plenty of ore on hand be is willing that posterity shall have something for which to drive.

#### TWO SUITS FOR SAME ORES.

#### Heinze Denies Latest Allegations in Amalgamated Copper Litigation.

special to The Tribune. BUTTE, Mont., Aug. 19.-Still another auswer has been filed in the Heinge-Amnigamated liftguilon. It was in the suit of the Boston & Montana company against the Minule Healy company A. P. Heinze, John MacGinniss and D. J. Pitz-geraid. This was a suit to recover \$1,000.000 for ore alleged to have been taken from veins of the Piccolo artil Gambette, which have their apices in the Colusa mine.

mine.

The answer of Mr. Heinze denies all of the allegations of the complaint and calls attention to a prior suit between the same parties to recover \$5.50.00, which it says is for the same ores, and in which the same issues are ciaimed to be involved. For this reason the Heinze interests say the Amalgamated should be debarred from maintaining the later action.
